**Title: Changing Contexts to Enable Innovation in Support of Health Transformation: Key Roles of Participatory Action Research**

The presentation and discussion will focus on observations on the Spinal Cord Injury Knowledge Mobilization Network, a national learning and innovation collaborative focused on secondary complications of spinal cord injury

Topics to be included are; its objectives, what we do and how we do it, its strengths and its challenges, and the role of its 'innovation curator.'

**Richard J. Riopelle**, MD, FRCPC, FCAHS., Department of Neurology and Neurosurgery, McGill University
