Information on KT and Integrated KT, including IKT background, relation to CIHRs mission, and IKT funding opportunities

Community-Campus Partnerships for Health (CCPH)
<http://depts.washington.edu/ccph/index.html>
Community Campus Partnerships for Health (CCPH) is a nonprofit organization that promotes health (broadly defined) through partnerships between communities and higher educational institutions. Founded in 1996, we are a growing network of over 1,300 communities and campuses across North America and increasingly the world that are collaborating to promote health through service learning, community based participatory research, broad based coalitions and other partnership strategies

Community Health Scholars Program
<http://www.sph.umich.edu/chsp/program/index.shtml>
The goal of the Community Health Scholars program (CHSP) is to increase the number of faculty at health professional schools, with an emphasis on schools of public health, who possess the capacity to carry out community-based participatory research* and teaching and who understand determinants of community health and how to build the capacity of communities, health-related agencies and academic centers to function as equal partners in community-based research, service and education

Wells, K; Miranda, J.; Bruce, M., Alegria, M., Wallerstein, N. (2004), Bridging Community Intervention and Mental Health Services Research, American Journal of Psychiatry, 161(6) : 955-963

M Stevenson JM and Cifuentes M. (2006) Recent Publications Regarding Community Based Participatory Research (CBPR): Annotated Bibliography
<http://www.fmdrl.org/index.cfm?event=c.beginBrowseD&clearSelections=1&criteria=S Stevenson#879>

NOTE: This bibliography is a useful tool for those wishing to get an overview of some of the key issues in CBPR. However, it is limited to items indexed in Medline and the authors limited themselves to the search term `community-based participatory research_`, which therefore precludes results where this phrasing was not to be found. Authors also did not adequately justify their rationale for selecting the subset of results (21 items) presented in the bibliography
